

# Ashwini Sadekar

Ashwini is originally from West-Central India, where she was born and nurtured. Her paintings are influenced by her colorfully rich cultural heritage, which includes a diverse range of art, architecture, dance, music, and languages.

A multidimensional persona Ashwini holds a Graduate degree in Electronics Engineering from Carleton University in eastern Canada. She has a strong attachment to the beautiful country of Canada.

She is now based in the Seattle area, and her passion is to capture the ethereal colors of the changing seasons in paintings. An extensive atelier training with Charles Miano, Camille Przewodek and Kimberly Trowbridge shaped Ashwini's artistic research.

Ashwini evolves as a painter by combining strong draftsmanship with a painterly vision of Monet's full spectrum color revelations, which gives her paintings fresh strength.
